SYED WAQAS MAHMOOD

OBJECTIVE	To write supreme code, and rock-solid tests to bank on it, with automated processes while using state-of-the-art tools and technologies.

CAREER SUMMARY

- Turned around the wallet functionality of Safello, providing rock-solid Bitcoin wallet & transaction management.
- Implemented the backend architecture and user app-flow of Pliro.
- Lead the end-to-end development of a high-end, state-of-the-art Bitcoin Trading Exchange.
- In-charge of centralizing the continuous integration and deployment for the energy services department at Aurea.
- Migrated 9 products' source control system from SVN to GIT at Aurea.
- Automated the processes of algorithmic trading applications at Aurora used by brokers in the stock market, with risk management, order updates and liquidity aggregation.
- Dealing directly with clients since the start of my career, with excellent communication skills and native proficiency in English.
